

...july 15, 1986...

*today i saw beyond the clouds –
beyond – above – within –
a pandemonium of scenes
exploding through my brain –
places – countries – vistas –
people and happenings
interweaving in a life
i shall someday become –*

*it is as i am not here
but there and there and there –
both diving into mysteries
and waiting still to go –
i wind and rewind videos
again – again – again –
searching for that single frame
that waits to pull me in.*
