

...october 15, 1991...

***late night talk expands
in radio waves
erasing distances
into a single now –***

***an atlantis energy –
where continents of thought
are sent – umbrella-like
around the world –***

***clearer – more alive –
as if another earth
awakes at dusk
in songs of transience –***

***we are the power
of these midnight chats
as late-night voices
revive forgotten dreams –***

***words dive and swim
between the mind and blood
as we become
more than we once believed.***
