

*...november 24, 2008...*

*is there a we  
where the flaming gold  
of a midnight sun  
exploded birth –  
and into the dark  
of multiple flames  
one of those flames  
became our earth?*

*is there a we  
that the universe wrote  
on a new-born earth  
in the once upon  
creating a sound  
crescendo-ing  
the cellular symphony  
life began?*

*is there a we  
that we have evolved  
slowly absorbing  
a gift of stars  
where future selves  
are drawing us on  
luring us into  
a vortex of change –*

*born of the sun  
and the milky way  
we are the future  
and we are the past –  
we are all cells  
born into earth  
until all our hearts  
ignite a rebirth.*
