***stretch and twist and pirouette  
like whirling dervishes of light –  
bend and float and spin around  
to cadent drums of undertone –***

***leap together – leap apart –  
expose the wild symphony  
that spirals through the midnight sky  
into cosmic memory –***

***and when exhaustion begs for rest  
then rest to watch the galaxies  
spin their cellular response  
into your deepest memories.***
