

...february 28, 2011...

**i am the goddess-god of light
the fiery sun - the blazing white
bursting through a molten core
exploding into blackest night -**

**i am the power that preserves -
encouraging each seed bud
i push the tidal wave of spring
into an ever changing world -**

**i am the creativity -
i am each breath from birth to death -
i am the love and nourishment
i am the scourge of emptiness -**

**from hurricanes to firestorms
from tenderness to the arcane
i am the all of everything
i sing the cosmos into being.**
