

...july 25, 2012...

shadow portrait on the wall  
triangle face and sculpted eyes –  
a teardrop pendant hangs your brow  
a mystic eye on other worlds –

black-grey-white austerity –  
goddess presence – gathering –  
window sunlight patterns  
shifting – pulsing – drawing in –

as i watch – your eyes become  
radiant – omniscient –  
as if a strange and alter sun  
was trapped within and gazing out –

a piercing stare – meeting my own  
an archetypal agelessness –  
till i am riveted between  
eternity and transience –

a portal shared – and opening –  
a universe of interchange –  
till i am you are you are me  
in a dimensionless exchange.
