

...november 11, 2019...

**a skytrain riding afternoon  
rearranging space and time  
i leave before the late of soon  
into – out of the underground –**

**driverless – remote controlled –  
i am sped past entrances  
from streets above to tunnel lights  
fusing crazy distances –**

**like dropping into rabbit holes  
people enter – merge and go  
into worlds where no one knows  
the anywhere they were before.**
