

...february 24, 2021...

hello nazi world  
how shall we decrease the population?  
let's create a virus instead of world wars –  
we'll patent it and label it c.o.v. nineteen –  
telling no one of our private joke  
that it's been nineteen years  
since new york's nine-one-one –

hello nazi world – what shall we do next?  
let's mask the population and pretend  
depriving them of oxygen will make them well -  
we'll mask the children too –  
the public's far too stupid to research anything  
but just in case – we'll brainwash them with media  
and propaganda experts  
and silence anyone who disagrees –

hello nazi world  
we'll commandeer the police  
to destroy all churches and small businesses –  
we'll close them or we'll fine them  
until there is no way they can survive –  
only our giant corporations  
will be allowed to thrive –  
it's just the little guys we need to end –

hello nazi world – we need to quarantine –  
we'll start with nursing homes  
and make them into prison camps –  
no visitors – no entertainment – nothing  
to make them want to live –  
we'll tell them only workers can go in  
masked and gloved – but visitors don't count –  
let's hurry them along to death  
to make room for more –

hello nazi world – isn't it wonderful  
how everyone obeys without complaint –  
maybe we should get them triple masked  
to dull them down another year or two –  
so obedient – so naïve –  
they even think someday we'll let this end.
