

...may 14, 2022...

**it was the first time ever  
gaia's stars combined  
to shift the frequencies of space  
from three to four to five –**

**some froze between dimensions –  
some died then breathed again –  
falsehoods were stripped naked  
and hearts began to shine –**

**it was the first time ever  
men and women rose  
to watch the dying of a moon  
that breathed a new-born sun.**
